

# OYINDAMOLA SALAKO

## BRAND STATEMENT

As an analytics project manager, I design enterprise-wide business intelligence solutions to track key performance metrics, increase productivity, and eliminate inconsistencies – while providing advanced efficiencies at all levels of the managerial chain. My peers and supervisors often credit my quick-learning and dedication towards the success of our team goals.

## WORK EXPERIENCE

### AT&T, Real Estate Analytics & Systems      Lead Financial Analyst      Jul 2019 – Present

- Develop BI solutions to track 700K+ yearly service tickets and \$600M+ annual expense to assist with operational planning and improve building management strategies for over ~9K+ properties with ~150M+ sqft
  - Improvements: reducing pending tickets by 30% from 40K to 30K, on average while total created tickets reduced by 10K; re-defining service level agreements, rebalancing regional area/property manager portfolios
- Utilize ETL and data architectures to provide data/analytics services, build visualizations, and coach self-service analytics

### AT&T, Finance Development Program      Financial Analyst & Chief of Staff      Jul 2018 – Jul 2019

- Collaborated with financial analysts and chief of staffs across AT&T Communications Company (ACC) to create executive presentations, talking points, and related documents for the Board of Directors, Operations Review, and ad-hoc meetings and conferences for the CFO and CEO of ACC
- Designed as an in-house consultant on the automation team to transform financial reports into real-time multi-faceted dashboards in 9 different Xandr business units, providing performance metrics easily accessible to leadership

### STUDIO71, LP      Digital Media Finance Intern      Jan 2018 – May 2018

- Analyzed financial data, trends, and opportunities in traditional entertainment and digital media content to support 7 cross-functional teams in Advertising Operations, Talent Management, and Human Resources with budgeting and forecasting
